| 1 | I oppose fracking in all areas of Northern Colorado. We need to be investing our time and money into renewable, carbon neutral, and sequestering technologies to ensure public health and safety in the future. We have less than 12 years to mitigate the DISASTROUS effects of climate change and we need to act NOW. We need public servants who recognize the pressing concerns of global warming and who are bold, brave and willing to enact policy changes NOW. I am very disturbed to see just HOW MANY applications there are on this website for fracking in Northern Colorado. This is appalling and absolutely disgusting. Thank you for doing your part to support a sustainable solution to this problem. | 02/08/2019 |
| 2 | <p>This senseless sight has gone from a 24-well mega pad to a 28 well mega-pad.....less than 1/2 a mile from my subdivision. This worthless commission should quite whining about their "per diem" and actually come and visit the site. I can waive to you from my back porch!! This is NOT an appropriate place to put a 28-WELL MEGA PAD!! Any person with half a brain would see that the site is WAY TOO CLOSE to a neighborhood of 484 homes! It is time that the COGCC prioritize the health and safety of communities above oil and gas profits!! IT IS WAY PAST TIME FOR THIS COMMISSION TO "DO YOUR JOB" AND STOP THIS MADNESS.</p> <p>Connie Beach</p> <p>Springvale Subdivision</p> | 02/10/2019 |
