**General Comment:**

This is a follow-up final reclamation, good housekeeping and stormwater inspection.

This inspection is to document compliance for the following corrective actions:  
603.f: Noxious weed management.

This inspection is also in response to Form 18 complaint #200447500 in regards to noxious weed management on Foundation locations; On 6/25/2019 complainant submitted a formal complaint Form 18 regarding noxious weed issues on location #447525, and #331849 (associated with battery #447523). Complaint was forwarded to inspector on 6/26/2019 and inspector made contact with complainant on 6/27/2019 at ~08:49 hours. Complainant stated that Foundation has failed to conduct sufficient and ongoing noxious weed monitoring and management, as Diffuse Knapweed (Centaurea diffusa) has continued to establish on the locations, and spread onto the adjacent lands. Complainant also indicated that Field Bindweed (Convolvulus arvensis) has become an issue.

On 7/1/2019 and 8/8/2019, Inspector conducted a follow-up inspection, it was documented that Centaurea diffusa issues remain and that sufficient and ongoing noxious weed monitoring and management does not appear to be being conducted. Additionally, Convolvulus arvensis has established and spread throughout a large portion of the location.

It was documented in this inspection that Centaurea diffusa issues remain and that sufficient and ongoing noxious weed monitoring and management does not appear to be being conducted.

Refer to the "Good Housekeeping" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

**Location**

**Good Housekeeping:**

Type

WEEDS

Comment:

Previous inspections documented that Diffuse Knapweed (*Centaurea diffusa*) have continued to establish on the location and access road and are encroaching onto the adjacent lands. Inspections required operator to properly remove and control noxious weeds on location.

Sufficient and ongoing noxious weed monitoring and management is not occurring.

Noxious weeds have continued to establish and mature on location. Corrective action remains applicable.

Corrective Action:

Properly remove and control noxious weeds on location and adjacent lands where weeds have spread from the location. Ongoing weed management and monitoring is required, and needs to occur in accordance to COGCC rules and regulations.
