Divide
Field

4 Duncan C. SE NE 3 8N 53W 6th
(Well No.) (Lease) (1/4 Sec.) (Sec.) (Twp.) (Range) (Meridian)

The Well is located 1980 Ft. ~~(N)~~ of Section Line and 660 Ft. ~~(E)~~ of
(S) (W)
Section Line.

The elevation above sea level is To be submitted later. Ft.

Details of Plan of Work: (State names of and expected depths to objective sands. Show sizes, weights, and length of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

We propose to drill a well, using rotary tools, on the above described location to be known as Duncan #4.

It is expected that approximately 120' of 8-5/8" OD, 10V. thd., 28.00#/ft., of surface pipe will be run and cemented to the surface. The well will be drilled to the "D" sand of the Dakota formation, which is expected at approximately 4800'KB.

If commercial production is encountered, a production string consisting of 5-1/2" OD, 8R. thd., J-55, 14#/ft. casing will be run and set on top of the producing formation and cemented with 100 sacks of cement.

All measurements will be taken from the top of the Kelly Bushing.
