Comment:

This location is not in compliance with Rule 1004. Reclamation rules require reclamation activities to be conducted within three months of plugging on cropland. Well was plugged 5/8/2018.

Operator submitted a Form 4 Sundry Notice on 9/11/2019 (Doc.# 402172937) describing this well/production facility location is planned to be used as part of the new Chalk Seeley access road. However, as of 9/17/2019 the Operator has only constructed a portion of the new access road and only a portion of the Chalk Seeley location which does not include this well/production facility location. Refer to the attached inspection photos and COGCC Comments section for further detail.

Corrective Action:

Operator shall submit a timeline of the planned work to construct the new access road and the remainder of the Chalk Seeley location.

Date **10/01/2019**

User

Date

Operator should have submitted a Final Reclamation variance request, as this location is over one year out of compliance and the Operator has not conducted its planned operations to construct the new access road through this well/production facility location. An approved Form 2A doesn't relieve the Operator from submitted a Final Reclamation variance request. If there is a compliance issue similar to this, Operator shall submit a Final Reclamation variance request as soon as possible. A Form 4 Sundry Final Reclamation Complete Notice is not the correct submission when communicating to COGCC staff a compliance issue regarding Final Reclamation.
