Comments:

The Walker Jones 1-26 well has been plugged, and all the facility equipment has been removed. However, the Chalk Seeley 7-26 pad will utilize the location as an access road, and the disturbance area partially overlaps with Walker Jones 1-26 facility and well. SRC has an approved 2A permit for the Chalk Seeley Federal 7-26 pad. Attached is the new facility drawing that has been submitted and approved, it is document # 401691135. It shows the new access road through the location. SRC did not do final reclamation efforts per COGCC rule 1004 for the plugged Walker Jones 1-26 well or production facility as it will be utilized as a new access road for the Chalk Seeley Federal 7-26 wells. See attached variance request document attached.

Attached is the facility layout drawing, document # 401691135 to show the new access road for the Chalk Seeley 7-26 pad through the old facility and well for the Walter Jones 1-26, and the subsequent form 6 for the plugging of the well.
