ACTIVE

OPERATOR OF RECORD:

The commission reviews all well files for complete information. The following information which is missing is needed to complete the existing data base which is being used as input to the Flat Mapping Information System (PMIS). This information is also to be submitted as required by the Rules and Regulations of the Commission and Colorado Revised Statutes 34-60-101 et seq. Should you feel that this information or document has heretofore been submitted, please assist the Commission by furnishing it again. All information should be submitted within fifteen (15) days of the date of this letter.

The missing information may pertain to an expired Permit-to-Drill. Please advise us of the spud date if the well was drilled, if the site was prepared only, or if no site work was ever commenced. No plugging security will be released until a satisfactory site inspection by an engineer of the Commission has been completed. Please advise us when the site will be ready for final inspection.

If all information is received, operators will not be contacted again, however, the Commission will continue to make additional timely reviews of missing well information and request its prompt submission.

Please address all information to the attention: Missing Well Records.
