**General Comment:**

On 9/16/2019, Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Revegetation and stabilization measures need to be installed no later than 11/15/2019.

See below, and attached photos for additional detail.

1003 f. Weeds Noxious weeds? \_\_\_\_\_

Comment Little desirable vegetation present on well pad cut and fill slopes, as well as unused portions of the flat well pad. As evidenced by drill seeding rows and small seedlings, re-seeding has recently occurred. However, a germination transect was conducted and only 0.3 desirable seedlings/square foot were observed. Therefore, it appears that the re-seeding effort is not successful.

Corrective Action Revegetation needs to be conducted throughout the areas not needed for production operations. Mulching is recommended for successful vegetation establishment and erosion control.
