**General Comment:**

This is an Abandoned Location Inspection for Location and Twenty-four Wells, listed in Inspected Facilities, above. APDs were First Approved in 2008; Permits Abandoned in 2018. This Location was constructed. APDs at this site were not drilled, though Conductors were set.

Comment:

Location has been reclaimed and Conductors closed; with Final Reclamation now In Process. Desirable Vegetation is establishing across the site, however access road area appears more compacted and vegetation less successful. There is population of ruderal/ annual weeds and noxious weeds spread across site and access road. Kochia, Horehound, Burdock, Bull thistle, Tumble Mustard, Russian thistle and Mullein were some of the species identified. It appears that controls may have been applied to noxious weeds, but not in a timely manner. One Tamarisk tree (B List Noxious Weed) was noted on edge of main access road that runs along Northeast side of site.

Corrective Action:

Continue control of Noxious weeds in 2020, applying controls before seed head maturity. Tamarisk tree on access road should be treated ASAP.

Date **10/16/2019**
