Denver, Colorado

Dear Sir:

H L M Drilling Company has informed us that they intend to drill a well to test the "D", "J", "M" and "O" sands of Cretaceous age at a location in the NW NW NE Section 7-9N-52W, Logan County, Colorado. This location would be within the area of "D" and "J" sands production and meets the requirements of the Spacing Order in the West Padroni Field.

Please be advised that Sinclair Oil & Gas Company has no objection to the H L M Drilling Company drilling at the above described location to the "M" and "O" sands which have not been spaced in this area.

Very truly yours,

J. W. Jackson
