Description

1 Drilling/Completion Operations	Alternative Logging Program: One of the first wells drilled on this pad will be logged with an open-hole resistivity log with gamma-ray, from TD into the surface casing. All wells on the pad will have a cement bond log (CBL) with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs will state "Alternative Logging Program - No open-hole logs were run" and will clearly identify the type of log and the well (by API#) in which open-hole logs were run.

Permit	Changed local government disposition from "Waived" to blank. As noted in comment, Garfield County considers oil and gas development a use by right and is therefore not subject to local government siting. No waiver is needed, nor was a waiver provided.	09/20/2019
Permit	Final Review Completed.	09/19/2019
OGLA	08/20/2019 to 08/27/2019 - Since Form 2A Oil and Gas Location Assessment (#402063034) met Objective Criteria #5.c, #6, and #12, COGCC staff conducted its technical review of this Form 2A within the context of SB 19-181; following additional analysis of the Objective Criteria, the director determined that this application (Form 2A and associated Form 2s) meets the standard for the protection of public health, safety, welfare, the environment and wildlife resources set by SB 19-181; the 'Objective Criteria Review Memo' document (#2108932) was attached to Form 2A#402063034; 09/19/2019 - passed the OGLA and OGLA-181 tasks on this Form 2#402065771.	09/19/2019

Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile of this proposed surface hole location is 0'. Operator's proposed surface casing will cover all current water wells within one mile of the surface hole location. Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required.	07/19/2019
Permit	Passed completeness.	07/18/2019
