Comment: Site does not appear fully re-contoured/graded. There remains evidence of disturbance to NW of well position; where, in COGCC Map 2013 aerial there is a facility/ tank(?) installed. Heavier weed growth is evident in this tank area. State B list Noxious weeds, Absinth wormwood and Canada thistle are established across location. Partially buried wattles and bits of plastic erosion control material were seen. Wattles become Debris when no longer needed for stabilization of site.

Corrective Action:	Conduct work needed to fully reclaim all areas disturbed by O&G activities, establishing uniform vegetation across all disturbance areas to 80% of reference area requirement. Control Noxious Weeds, contacting Moffat County Vegetation Manager for control recommendations and requirements.	Date	06/17/2020
