**Waste Management:**

Type	Management	Condition	GPS (Lat)	(Long)
Comment	Operator has not submitted any information concerning Remediation Project 12779 since 05/13/2019. The extent of impacts to soil and ground water were not fully delineated as of that time. A total of 16 temporary ground water monitoring wells were installed on and adjacent to the location, a majority of which are located outside of the metal perimeter fence around the disturbed area, i.e. off of the location. Those temporary wells, without locking caps, are potential preferential pathways for contamination of ground water. The excavation was open as of the date of this inspection and has been partially flooded with ground water.			
Corrective Action	Submit Supplemental Form 27 including; GPS coordinates and analytical results for all soil and ground water samples collected subsequent to 05/13/2019.  Additionally, the Supplemental Form 27 must provide details on the following activities: Ground water quality monitoring program. Investigation of surface water quality in the wetland adjacent to the north side of the location. Removal of the E&P waste being stored on the location. An updated implementation schedule.			Date: 10/25/2019
Comment				
Corrective Action				Date:
Comment	E&P waste not properly stored, handled, transported, treated, recycled, or disposed of per Rule 907.

**COGCC Comments**

Comment	User	Date
Surface owner has submitted a complaint (Document 200448186) concerning the subject location and the operator's actions with respect to Remediation Project 12779.  Multiple residences are located within 135' of the open excavation and spoil piles described in this inspection.  A wetland is adjacent to the north side of the location.	canfield	10/17/2019
