**General Comment:**

On 10/22/2019, Catherine Roy conducted a reclamation and stormwater inspection to followup on corrective actions identified during an October 2018 inspection. The following compliance issues were observed:

-Corrective action to control erosion for 12/8/2018 is not sufficiently addressed. Stormwater and erosion controls are needed to stabilize erosion within the project area.

See below, and attached photos for additional detail.

Comment: Erosion continues within eastern and southeastern project area. Corrective action is not addressed.

Corrective Action: Stormwater and erosion controls need to be installed to stabilize erosion within the project area. Stormwater and erosion controls need to be installed using good engineering practices such as those described in CDOT erosion control manuals. Corrective action is back-dated to document original corrective action date and time that location has been out of compliance.
