<p>On October 16, 2019 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the SG Interests Falcon Seaboard 11-90-12 #3. For the most recent field inspection report of this facility, please refer to 688800558. The purpose of this site visit was to document the progress of REM Project #14268.</p> <p>Location perimeter fencing has a gap where Spill/Release Point ID #467789 flowed off of location, and gate at entrance to location was open upon arrival. No safety fencing present around excavations.</p> <p>Impacted soil excavated as a result of Spill/Release Point ID #467789 stored along the western edge of location is not adequately contained. Perimeter berm around soil stockpile is insufficient to contain contents.</p> <p>A stock pile of soil along the southern edge of location and several smaller ones on the east side of the pad are of unknown origin.</p> <p>The replacement dump line appears to be temporary. The steel flow line is currently anchored by chains to a skid steer and the stairs of the tank battery secondary containment.</p>	hughesjo	10/22/2019
