True Oil Company  
P.O. Drawer 1612  
Casper, Wyoming

Attention: Mr. J. E. Dobos

Gentlemen:

Returned herewith for resubmission are your Notices of Intention to Abandon your Wagner No. 1 and No. 2 wells. Also, please find a copy of our current Rules and Regulations and a supply of forms.

Kindly refer to Rules 307 and 332 for plugging of wells. The detail of your plan of work for both your Wagner No. 1 and No. 2 wells is good as far as you have gone; however, in addition, we require that you set a cement plug at the bottom of your surface pipe, and a cement plug with a metal plate welded or screwed on top of your surface pipe.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

---

A. J. Jersin, Director
