Comments:

This is a corrective action response to field inspection report dated 6/25/2019, document number 696200317. After consultation with the surface owner and the field inspector, we hauled in topsoil to cover the area needing additional reclamation. On 7/19/2019 we used a grass drill to seed a pasture grass mixture over the area to be reclaimed. For erosion control the seeded area was covered with straw and the straw was tucked in using a vertical disc. We will monitor this area until a sufficient level of re-vegetation has been achieved and then request a final reclamation field inspection.
