Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Temporary tanks were set in a staging area near the Bladerunner location for a job to be performed in the area and were attached to a gathering line to fill. Evergreen employee came to location and noticed the valve had not been shut properly causing the tank to overflow. It is estimated 120 bbls of produced water was released into the field ran down through a culvert and across and lease road. The employee isolated the valve immediately. No State Waters were involved and the landowner was notified. Root cause investigation is ongoing & further repairs are in progress.
