Re: LS - 1873

Contract No. P- 4049

Hendricks #1 - E/2 SW/4 Sec. 14-9-54

Logan County, Colorado

Gentlemen

Kansas-Nebraska is purchasing the gas produced from the above-captioned lease. Rule No. 311 of the Oil & Gas Conservation Commission of the State of Colorado requires the operator to file with the Commission its Form No. 10 "Producers Certificate of Clearance and Authorization to Transport Oil or Gas From a Lease". The Commission has advised us that their records indicate we are taking gas from some wells on which no Form No. 10 has been approved and pointed out the need for immediate corrective action.

We do not have a copy of this certificate covering subject lease and ask that a copy, showing Commission approval, be furnished promptly. If you have not filed for such a certificate, we ask that you do so promptly since both Producer and Transporter are in violation of the Commission's rules and regulations.

We will be obligated to suspend gas purchases from the lease if an approved copy of this certificate is not furnished to us within 30 days from the date hereof and continue such suspension until we are furnished an approved copy of Form No. 10. Kindly give this matter attention promptly so that gas purchases can continue without interruption

Very truly yours,

KANSAS-NEBRASKA NATURAL GAS
COMPANY, INC.
