**General Comment:**

On 11/12/2019, Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Revegetation of areas not needed for production operations needs to be conducted. Stormwater and erosion controls are needed until revegetation areas are stabilized with desirable perennial vegetation.

See below, and attached photos for additional detail.

## 1003 f. Weeds Noxious weeds? \_\_\_\_\_

Comment Previous inspections document that equipment was stored on the well pad as staging during drilling on adjacent well pad. Little desirable vegetation is present in areas on the well pad not needed for production operations.

Corrective Action Revegetation needs to be installed within the project area. Corrective action date is the date of the inspection, as it is the expectation that revegetation is progressing at this time.
