General Comment:

This is a Reclamation Inspection in Response to AOC 1V-680/Docket No. 180900016.

This is also a follow up of the previous inspections document number 673504379, 673504439, 689900032, 689900273, 674902271, 689900323, 689900885, 689901093.

Corrective actions of the previous inspections have not been performed.

See attached photos and additional details within this report.

Comment

Interim reclamation was not performed prior to plugging the well. A form 6 Well Abandonment Report was submitted indicating the well was plugged and abandoned on 12/2/2017. The total area of the location was 4.42 acres excluding the new unpermitted disturbance. The 2A specifies the size of the location after Interim Reclamation must be 1.2 acres. The operator was directed to request delayed interim reclamation following the NTO: Interim Reclamation Procedures for Delayed Operations. A complete delayed interim reclamation request was not submitted. The location has been out of compliance for Interim reclamation since 2014.

Comment:	The access road and eastern portion of the location have not been reclaimed. The cut and fill slope at the location is not stabilized and there is insufficient vegetation growth. The western and northern portion of the location which was reclaimed does not appear to have desirable vegetation establishment and seeding has failed. There are undesirable weed debris throughout the location and List B noxious weeds are present. There are dead trees that remain at the location and no replacement trees were planted. Reseeding has not been performed and there is weed debris throughout the location. Corrective actions of the previous inspections have not been performed. Corrective action needs to be performed immediately.		Date _____
Corrective Action:	Comply with 1004 Rules Reclaim the access road and eastern portion of the location. Remove the cattle guard and culvert from the access road. Monitor and control weeds and remove weed debris. Reseed the location to establish desirable vegetation cover reflective of the reference area. Stabilize and seed the cut & fill slope to establish vegetation cover. Remove remaining dead trees and replant new trees. Provide the seed mixture used for this location.		
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>			

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage the unpermitted disturbance area and the location.	CostaR	11/14/2019
The unpermitted disturbed area was reclaimed and vegetation appears to be establishing. There is some vegetation noticed in this area that is not reflective of the surrounding reference area. Seed source information is required to evaluate compliance of Rule 1003 e. (2).	CostaR	11/14/2019
