General Comment:

On 11/12/2019, Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

- Stormwater and erosion controls need to be installed by 12/6/2019.
- Revegetation needs to be installed by 4/1/2019.

See below, and attached photos for additional detail.

Comment **Vegetative cover is sparse to bare on the majority of the well pad cut and fill slopes.
Vegetation on the well pad is in a grazed condition.**

Corrective Action **Revegetation is needed in portions of the project area with bare and sparse vegetative cover, especially on the well pad cut and fill slopes. It appears that livestock exclusion is needed to ensure successful vegetative establishment.**

Comment: Erosional rilling and scouring are observed on the well pad cut and fill slopes with little vegetative cover.

Corrective Action: Stormwater controls (ie BMPs) and erosion controls (ie mulching, blanketing) need to be installed to stabilize erosion within the project area. These controls need to be selected, sized, installed, and maintained in accordance with good engineering practices and until location is stabilized with desirable perennial vegetation.
