MERITS OF A VERIFIED APPLICATION AND SUPPORTING EXHIBITS**

By Verified Application ("Verified Application") filed with the Colorado Oil and Gas Conservation Commission ("COGCC") on September 7, 2010, Williams Production RMT Company ("Applicant") by and through its attorneys, Beatty & Wozniak, L.P., requested that the COGCC establish an approximate 160 acre drilling and spacing unit for the Williams Fork Formation and Iles Formation (including the Segoe member of the Iles Formation) described as the NE/4 of Section 16 in Township 3 South, Range 97 West, 6th P.M., Rio Blanco County, Colorado. BACKGROUND AND STATUS OF THE APPLICATION

1. Applicant owns a leasehold interest in the Application Lands as described in its verified application.

Verified Statement of Maxwell Faith

In support of the request for Director approval of the Verified Application of Williams Production RMT Company in Cause No. 527, DOCKET NO. 1009-SP-26, pursuant to Rule 511.b, Maxwell Faith, Landman of Williams Production RMT Company, upon oath, deposes and states as follows:

- a. I am currently employed as a Landman of Williams Production RMT Company ("Williams"). I have been and am presently responsible for and have knowledge of the land position related to the Application Lands.
- b. Attached as Exhibit A is a copy of my resume prepared by me. Attached as Exhibit B is a plat of the application lands, shaded in green, which were prepared by Jacob Frost under my supervision and control. I have reviewed this plat, and to the best of my knowledge and belief, the exhibits are correct and accurate as of the date of this Verified Statement. Exhibit B shows only a portion of Williams' Ryan Gulch prospect situated in Rio Blanco County, Colorado. The requested drilling and spacing unit is circumscribed on this exhibit. The application lands previously were approved for ten acre density drilling for the Williams Fork and Iles Formations (including the Sege Member of the Iles Formation) under the Commission's Order 527-6 dated January 11, 2010. Both the mineral estate and the surface estate of the application lands are federal. Williams owns a leasehold interest in both of these leases. Williams has spud two wells on the application lands being the Federal RG 531-16-397 and the Federal RG 41-16-397 wells. Williams has filed this application for an approximate 160 acre drilling and spacing unit in order to avail itself of the involuntary pooling provisions of the Colorado Conservation Statute. As explained further in my statement for the companion force pooling application, the other working interest owners in these wells have not agreed to participate in the drilling of the wells.
- c. I have not been advised of and am not aware of any protests to this Verified Application.
- d. The parties identified on the Exhibit A to the Verified Application are the parties entitled to notice under the rules of the COGCC.
