Mr. D.V. Rogers  
Director  
State of Colorado  
Department of Natural Resources  
Oil and Gas Conservation Commission  
Room 237, Columbine Building  
1845 Sherman Street  
Denver, Colorado

*24-FN-520*

Dear Mr. Rogers:

In response to your form inquiries as per copies attached, please be informed that the commencement of these operations were both delayed due to time consumed in arranging for an entry road to the locations. The State #1-24 well was plugged and abandoned as a dry hole this past week-end and the applicable forms for your department are now in the process of being prepared and will be transmitted to you this coming week. The other well, the State #2-24, was also a dry hole, same plugged and abandoned the forepart of this week.

The state forms to complete your records will be filed at an early date, at least sometime next week. It is trusted that these arrangements are satisfactory.

Very truly yours,

DAVIDOR & DAVIDOR, INC.
