INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Produced water from this well was being stored in this offsite pond. The well has been switched to send the water to a tank on location.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

To investigate the soil quality in and around the production pit, we collected grab samples from top of pit and bottom of pit. These samples were analyzed for Table 910-1 standards criteria.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Upon meeting at the location with the landowner and COGCC, it was determined that although produced water has not gone to this permitted offsite pond for some time, Evergreen can no longer use this offsite pond for storage of produced water. The landowner requested the pond be left untouched for collection of stormwater and snowmelt. This Form 27 is being submitted to terminate the existing COGCC permit 113485. Evergreen is working on a variance with COGCC environmental team at this time.
