1003 f. Weeds Noxious weeds? F

Comment

Majority of the interim reclamation areas still appear to be infested with Cheat grass, and ruderal debris weeds. Because of snow cover It can not be determined if Operator conducted vegetation assessment and any activities indicated by assessment required by CA from 5/21/19 Insp. It is evident that Weed control program is largely unsuccessful There is also a new weed addition in irrigated hayfield of Interim; Cocklebur, which is very troublesome to livestock, will depreciate hay value and is toxic at the seedling stage.

This site will need to be assessed in Spring by Inspector and Operator.

Corrective Action

CA#1) Provide Seed Mixes used on both areas of Reclamation by 6/7/19. (From Previous Insp). Contact Inspector if these were previously submitted.
CA#2) Control Weeds; Recommended to collect burr seeds ASAP, before incorporated into seed bank.
