1	hi! there should be a moratorium on fracking in colorado, as per SB 19-181, until it has been proved that the operations present no harm to life of any kind, whether animal, human, which includes harm to our air, land & water, which is what sustains all life. the health & well-being of all coloradans should be our highest priority & we should be investing in alternative sources of energy that will provide energy & a livelihood for the long-term rather than rely on the insignificant energy produced by fracking, especially at the huge cost to our lives & the lives of future generations. thank you, jaimie epstein	06/19/2019
