General Comment:

On 2/20/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Weeds need to be managed to encourage desirable revegetation and prevent debris by 6/1/2020. Subsequent treatments are likely needed.

See below, and attached photos for additional detail.

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment: Review of inspection history and response indicates that revegetation was conducted and soil amendments applied in 2017. Revegetation is progressing within the interim reclamation areas. Dense annual weed debris appears to be discouraging establishment of desirable vegetation in portions of the interim reclamation areas and resulting in debris.

Corrective Action: Manage (i.e. mow) weed debris to encourage establishment of desirable vegetation and prevent debris dispersal. Date **06/01/2020**

Overall Interim Reclamation In Process

Final Reclamation/ Abandoned Location:
