2 ☒ CA# 136203

Corrective Action: Comply with Rule 326.b To maintain shut-in status, the well must be able to demonstrate ability to produce without mechanical intervention.

Date: 02/28/2020

Response: CA COMPLETED

Date of Completion: 02/27/2020

Operator  
Comment: The Parker 29-34 is a long-term shut-in well and is part of the Alternative MIT program (AOC Docket Number 180900672, Order Number 1V-668) . I have verified that the well is not temporarily abandoned downhole (no isolation across the producing intervals) and is still connected to the facility and maintains the wellhead tree configuration (not temporarily abandoned at surface).

After speaking with the foreman, the well has the LTSI tag at the facility location and has the tag at the wellhead as well, satisfying all requirements from COGCC standpoint for this well to maintain shut-in status.

COGCC Decision: Approved
