472579	SPILL OR RELEASE	AC			-	Hiawatha Deep Unit 3	EI

General Comment:

On 3/2/2020 COGCC Staff, Kris Neidel inspected spill #472579 at the Hiawatha Deep 3 wellpad. Weather was overcast and 35 degrees. Stormwater, ice, snow and mud were all present at the time of inspection. The following was observed; an open trench from the separator to the outside of the tank battery. Soil from trench was placed to along the trench, no impacts were observed in the trench. Soil was removed along the western side of the separator to approximately 9 feet below the surface. Soil below the separator was observed to be impacted, visually impacted soil was stockpiled near the excavation. No Wexpro saff was onsite at the time of inspection. Soils below the separator should be delineated and tested for COGCC table 910-1. See Photos attached.
