General Comment:

On 3/10/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stormwater erosion continues within the southeastern project area. Stormwater controls need to be installed to stabilize erosion within the southeastern portion of the project area. Corrective action is back-dated to document original corrective action date (5/17/2019).

See below, and attached photos for additional detail.

<p>Comment: Erosional rilling and channeling continues within the southeastern portion of the project area. Stormwater BMP (unconsolidated berm) and grading are not installed using good engineering practices, nor adequate to stabilize erosion. This is the third corrective action for stormwater erosion in this area.</p> <p>Corrective Action: Stormwater controls need to be installed to stabilize erosion within the southeastern portion of the project area. Stormwater controls need to be installed using good engineering practices and adequate to stabilize erosion and manage stormwater flows. Culverts on access need to be monitored after storm events to determine whether they are adequate to convey flows.</p>						Date: 05/17/2019
<p>Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
