*As defined in COGCC 100-Series Rules*

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A contract water hauler left a valve on the production tank load line open releasing approximately 50 bbls of produced water to the ground outside containment. The release was contained to the plated pad. Remediation efforts are underway to remove the impacted road base. Once complete, confirmation soil samples will be collected and submitted for laboratory analysis. Analytical results will be included in a subsequent eForm 19.
