Facility ID:	475858	Type:	SPILL OR	API Number:	-	Status:	AC	Insp. Status:	EI

**Environmental****Spill/Remediation:**

Comment: COGCC Inspection response to Spill ID 475858, above ground produced water line. Leg of affected line has been replaced with stainless steel (photo). Spill affected an area around produced dumlins and several hundred feet in an east-west direction directly north of dumlins. A stormwater pond near the topsoil stockpile on north end of pad was apparently affected. No offsite impacts were observed. Approximately 10 yards impacted soil removed and stockpiled on location.

Corrective Action: Submit Form 19 Supplemental Report with map of the spill area extent along with pH, EC and SAR laboratory analytical data from background and spill area soil samples by June 5, 2020 as directed in approved Form 19-I/S. Include analysis for TPH (C6-36) and BTEX of soil samples from spill area. Include root cause for corrosion of produced water dumlins.

Date: 06/05/2020
