**General Comment:**

This is an environmental inspection of spill Document #2230925 by Encana Oil & Gas 10/24/2012. Photos attached to document location at time of inspection. Any corrective actions from previous inspections that have not been addressed are still applicable.

COGCC Environmental staff found no evidence of remaining impacts from the condensate spill on this location. Review of records indicates the spill was remediated immediately after spill discovery and consisted of only surface impacts. Spill status has been changed to Closed.
