CORRECTIVE ACTIONS:

1 ☒ CA# 136547

Corrective Action: CA#1) Provide Seed Mixes used on both areas of Reclamation by 6/7/19. (From Previous Insp). Contact Inspector if these were previously submitted.  
CA#2) Control Weeds; Recommended to collect burr seeds ASAP, before incorporated into seed bank.

Date: 06/07/2019

Response: CA COMPLETED

Date of Completion: 02/18/2020

Operator Comment: 1) Seed mix (from Granite Seed) used for reclaim is attached. TEP has discussed concerns with Granite Seed and they have advised that this particular seed mix may take longer to mature / establish than others, especially if drought conditions are prevalent. 2019 was very dry year in this area, and additional time may be needed for mix

to fully establish.

2) TEP will collect cockle-burr seeds from standing plants. Seeds will be bagged and disposed of at county land fill.

3) TEP proposes joint inspection with COGCC Inspector during May 2020 to conduct vegetation assessment and determine if additional actions are needed.

COGCC Decision: Approved

COGCC Representative: Not clear if the Irrigated pasture seed mix was used on both the irrigated/hayfield and the dryland portions of reclaim.

**OPERATOR COMMENT AND SUBMITTAL**

Comment: Burr seeds to be collected by end of February 2020. Seeds will be bagged and disposed of at county land fill. TEP agrees that conducting a joint vegetation assessment during the month of May 2020 would be appropriate to assess vegetation and determine if further actions are needed.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
