South West View on Tierra Piedra Pad showing natural vegetation of alpha and clover.

The 8 Canadian Thistles within the as built pad (design on file with the COGCC), sprayed 5/14 and 5/15, showing death.

South East Corner of Tierra Piedra Pad showing natural non invasive plant species. A total of 3 Canadian thistles were spot sprayed in this area on the morning of 5/15/20.

All other weeds, including all of the spotted knapweeds, majority of the musk thistles, and majority of the Canada thistles are outside the as built pad (design on file with COGCC). This area was constructed and is managed by Tierra Piedra Ranch. Consequently, this area was also sprayed by Tierra Piedra Ranch staff on 5/14/20 and 5/15/20 with weeds showing death as well.
