Latitude: 40.132155 Longitude: -108.852015

CORRECTIVE ACTIONS:

1  CA# 138578

Corrective Action: Comply with 1004.e and corrective actions. Date: 05/31/2020

Response: CA COMPLETED Date of Completion: 05/26/2020

Operator Comment: Prior to implementing corrective actions the Rio Blanco County Weed Control Supervisor was contacted to develop suitable strategies to address the management of noxious and undesirable species (primarily Halogeton and Cheat Grass).  
Following consultation with the county weed control supervisor, actions completed include removing roadbase gravel from former pad surface, harrowing the area to remove noxious weeds prior to them going into seed this season, installing a nutrient rich compost amendment to promote desirable growth, and broadcast seeding a mix consistent with the regional vegetative species.

Additionally, a sterile barley was selected as an additive seed to the mix. The sterile barley was utilized because of its tendency to germinate quickly and crowd out noxious weeds prior to them propagating, which will allow additional time for the desirable species to germinate and spread. All actions were agreeable and/or recommended by the weed control supervisor.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Approved pending re-inspection of this FIR resolution acknowledges the document was received. It is not an acknowledgement that the corrective action has been passed. A field inspection will be conducted at a future date to evaluate compliance with COGCC rules.

**OPERATOR COMMENT AND SUBMITTAL**

Comment: This FIRR is being submitted in response to FIRs 692401232, 696200932, and 696201219. All three FIRs contained similar corrective actions and had the same compliance date, therefore, based on the attached communications with the COGCC, one FIRR is suitable to cover corrective action items identified during the multiple inspections.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
