**General Comment:**

This is a reclamation inspection of the Pierre 13-11 well site which was plugged and abandoned on 10/12/2011.  
A variance request of select requirements of final reclamation was approved with COA's.  
See attached photos and additional details within this report.

VEGETATIVE COVER \_\_\_\_\_

Comment:

The access road and location remain by approved reclamation variance. The erosion issues previously observed have been repaired. The vegetation is establishing along the side of the main road and water bars have been installed. The COA of the variance approval requires vegetation to be established to 80% cover at the entire location and along the access road near the location. There are areas observed along the access road and location that will require additional seeding. Overall the vegetation appears to be establishing well throughout the location and no erosion issues were observed. See attached photos.

Corrective Action: **Comply with 1004 Rules.**

Date **07/22/2020**

Overall Final Reclamation

In Process

Well Release on Active Location ☐

Multi-Well Location ☐

#### COGCC Comments

Comment	User	Date
The corrective action date was provided to allow additional seeding to coincide with typical monsoon moisture in July for the region.	CostaR	06/04/2020
