General Comment:

On 6/24/2020 COGCC Staff, Kris Neidel inspected the site of Remediation Project number 11542 and Facility 324625 at the State 1-36. Weather was 75 degrees and cloudy scattered showers. The following was observed; Well PA, wellhead was cut off and on location, area of former pit and tin horn separator has been excavated into one excavation approx 60'x25' and was filled with water, water in excavation was muddy with no obvious sign of hydrocarbon, production equipment still present on location such as; 2; AGT's, Treater, Pumpjack, Pumpjack drive motor. Within 14 days of this document, the operator shall submit a Form 27 supplemental that presents a status update on work completed. No updates have been provided on this project since the project was created. Environmental staff discussed the supplemental Form 27 with Mark Brown on 6/26/2020, Mr Brown agreed that he submit a F27s and would include lab analytical, a description of excavation and sample locations. See attached photos.

Environmental**Waste Management:**

Type	Management	Condition	GPS (Lat)	(Long)
Oily Soil	Piles	Inadequate		
Comment	Piles are sitting on pad.			
Corrective Action	Soils should be removed as a part of Rem project.			Date: 07/31/2020
