Facility Name: Lamke 33-5-29 Number: 1  
Qtrqtr: SESE Sec: 29 Twp: 33N Range: 5W Meridian: N  
Latitude: 37.069990 Longitude: -107.407360

CORRECTIVE ACTIONS:

1  CA# 131769

Corrective Action: Reclaim portions of the project area not needed for production operations and control weeds.

Date: 11/15/2019

Response: CA COMPLETED

Date of Completion: 04/01/2020

Operator Comment: Please note corrective action has not been completed. Catamount Energy Partners has attached a proposed revised reclaim drawing. Catamount utilizes beam lift to operate the Lamke #1 well (05-007-06322). Workover rig operations to maintain production often require a service rig that needs to be oriented in a north south direction as depicted on the attached pad drawing. Vehicle and equipment also need to be able to move around the service rig and equipment safely. For these reasons Catamount proposes to reclaim the additional portions highlighted in white on the proposed map and not the originally proposed areas highlighted in green that would not permit workovers using a service rig. Catamount

requests permission to have this additional reclaim completed by 4-1-2020.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Operator submitted remedial report documented additional reclamation areas. Based on report, corrective action appears to be addressed.

**OPERATOR COMMENT AND SUBMITTAL**

Comment:

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
