Comment:

The well was plugged and abandoned on 3/19/2020. Per the 1003 Rules, all drilling pits need to be closed and reclaimed within 6 months after drilling and completion activities conclude for non-cropland. Therefore, the pits should be backfilled by 8/19/2020. All equipment appears to have been removed from the location. The soil piles are not maintained and protected from degradation of weeds and wind erosion. It is advised that recontouring and stabilization be performed by 8/19/2020. Otherwise, soils will need to be stabilized and protected per 1002.c. Additional reclamation and seeding of the location should be performed during the fall season.

Corrective Action:

Overall Final Reclamation

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: The soil piles are not maintained and protected from degradation of weeds and wind erosion. There are undesirable weeds growing along the soil piles. The soil is not stabilized and there is wind erosion occurring which is transporting the sandy soil offsite.

Corrective Action: Comply with 1002.c
Install or repair required BMPs per Rule 1002.f.(2)C

Date: 08/19/2020

Pits: ☐ NO SURFACE INDICATION OF PIT**COGCC Comments**

Comment	User	Date
All disturbed areas must be recontoured, properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation. Erosion controls must be implemented that stabilizes the seeded soil. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	07/17/2020
