Cc: John Heil - DNR <john.heil@state.co.us>

Good Morning Mr. Galer,

Myself and EPS John Heil conducted a joint inspection of the 16" pipeline release on Tuesday the 28th, while on site several weedy species and noxious weeds were observed throughout the disturbance area.

I wanted to give you a heads up that I will be submitting an inspection here soon with corrective actions requiring weed management. The CA date will today, per this notice.

The reason for the short CA date is due to a noxious weeds observed having reached seedhead maturity, and in the process of seed dispersal:

- Musk Thistle (*Carduus nutans*), Bull Thistle (*Cirsium vulgare*), Canada Thistle (*Cirsium arvense*) observed within the riparian areas of the disturbance
- Field Bindweed (*Convolvulus arvensis*), Chicory (*Chicorium intybus*), Halogeton (*Halogeton glomeratus*) observed throughout the upland disturbances.
- Tamarisk (*Tamarix ramosissima*) observed establishing within the irrigation ditch.

Thank you,

Aaron Trujillo
