Complaint #: 200449108  
Field Inspector Assigned: Chris Binschus  
Location ID #: 320095  
Inspection Document #: 697501802  
Nature of complaint: An inspection of the above location was conducted with focus on interim reclamation. Complainant indicated there were overgrown weeds at the tank battery and the Operator was not responsive. Also, there was a section along the southern tank battery that is no longer passable with a mower due to weed debris mixed with gravel.

Comment At the time of this inspection, COGCC staff observed unmanaged weeds at the tank battery. Also, there was weed debris mixed with piled gravel from previous weed management. It appears the Operator used a skid-steer to pile up weed debris/gravel.

Staff also inspected the well location (001-07996) and observed an unmanaged List B Colorado noxious weed, Canada thistle. Refer to the attached inspection photo.

Corrective Action Comply with Rule 1003.f. and Rule 603.f. to control and manage weeds at both the well location and tank battery. Also, properly remove weed debris/gravel piles along the southern tank battery.

The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.

Note- Per Rule 302.b., Operator may need to update some of the phone number contacts within COGCC's database. COGCC staff tried calling some of the phone numbers and each person indicated it was the wrong phone number. The emergency number and another number still worked, as well as the email contacts.	binschusc	07/30/2020
COGCC staff called and communicated this information as well as the weed corrective actions via a phone conversation with an Operator representative the day of this inspection.		
Note- per Rule 210.e., signs shall be legible. The Operator name is starting to wear on the well location and may need to be replaced in the near future.	binschusc	07/30/2020
