**RE:** Request for Consideration to be Given for Background Levels in Native Soils and Ground Water for SAR Per FAQ 32

REM #: 9640  
REM Doc #: 2526157  
Spill Site: Whittaker Flats D17 Pad, Loc #429734 (Drill Cuttings Landfarm)

Dear Alex:

The Whittaker Flats D17 pad sampling results indicated elevated readings for SAR. At the time of final reclamation, the Whittaker Flats D17 pad will be buried under a minimum of three feet of backfill cover and soil that satisfies either the Table 910 levels for SAR or the background levels for SAR within three feet of the ground surface at the site. The pad will be reclaimed in accordance with the 1000 Series Rules. Therefore, Laramie is requesting relief from the SAR exceedances via FAQ 32.

Sincerely,

Joan Proulx
