Comment

It was observed in this inspection that vegetative establishment on the interm areas of the Location appears to be uniform and progressing towards COGCC 1003 reclamation standards and requirements.

Two (2) monitoring wells were also observed on the north side of the tank battery; One well appears to be in disrepair. It is unclear if monitoring wells remain needed on the Location.

Corrective Action

Contact NW EPS John Heil (john.heil@state.co.us) regarding maintenance requirements of monitoring wells on Location, or proper abandonment procedures.
