#### COMMENTS:

On 8/26/2020, a Form 17 was completed with a beginning pressure of 67 psi and ending pressure of 0 psi. Gas was present at the beginning of the test and continued for 15 minutes, a sample was collected. Due to the initial pressure being high and the gas flow, Noble will install automation, monitor and blow down as needed for a period of 6 months, ending 2/26/2021. A gas sample was collected during the Form 17 and will be submitted once the lab analysis is complete. No mitigation measures have occurred to date, the blow downs will begin after email communication with the COGCC engineer, Nick McFarland.
