General Comment:

On 9/1/2020 Catherine Roy conducted a reclamation and stormwater inspection.

-2019 FIR Resolution form documents operator's response to corrective actions identified during a 2019 reclamation inspection. Corrective action is partially addressed. Upon reinspection the following additional actions are needed for site stabilization:

-Erosion controls need to be installed and maintained on portions of the the well pad cut-slope with bare soils, by 10/30/2020.

See below, and attached photos for additional detail.

1003 f. Weeds Noxious weeds? _____ I _____

Comment Weeds appear to be controlled at this time. Fencing is installed around working area and appears to be in good condition. Revegetation is progressing on well pad fill slopes, but remains sparse on the well pad cut-slopes.

Storm Water:						
Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Comment:		Ditch and berm installed around working area, as well as cobble run-downs. However bare soils on well pad cut-slopes need stabilization.				Date: 10/30/2020
Corrective Action:		Erosion controls (ie erosion blankets, fiber bonded mulch products, etc.) need to be installed and maintained on the well pad cut-slopes until properly stabilized with desirable perennial vegetation. Erosion controls need to be selected, sized, installed, and maintained according to good engineering practices such as those described by CDOT in their erosion control manuals.				
Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT
