Comment:

	<p>Location does not meet Final Reclamation requirements. Vegetation establishment (of seeded species) is not uniform across site. Areas are infested with weeds, Curly Dock, and Curly cup gumweed, though Native, considered a weedy species, a disturbance opportunist. Northwest area has better establishment of grasses. Heavy grazing pressure maybe restricting establishment of grasses. Some debris (cable, metal) has not been removed. Refer to Photo Log Attached.</p> <p>Seed mixture used at site (attached to F4) appears to be recommended by Seed company or Contractor, which does not comply with the COGCC rules. Please refer to Inspector Comment at end of report for continuation of Seed comment.</p>	
Corrective Action:	<p>Comply with COGCC 1004 Reclamation Rules; conducting work needed to establish uniform vegetation (reflective of reference area) across all disturbance areas to 80% of reference area requirement. Reclamation Activities to be complete by 11/16/20. Continue to monitor &amp; manage the site until Location is Passed for Final Reclamation.</p>	Date <u>11/16/2020</u>

<b>COGCC Comments</b>		
Comment	User	Date
<p>Seed mixture used at site (attached to F4) appears to be recommended by Seed company or Contractor, which does not comply with the COGCC rules.</p> <p>The Operator cannot propose a seed mixture and then obtain concurrence with the Surface Owner. The seed mixture must be proposed by the surface owners themselves or prescribed by the local NRCS. If the planted species at the location does not reflect the surrounding reference area, the location will not pass inspection.</p>	colbyl	09/06/2020
