## OPERATOR COMMENTS AND SUBMITTAL

Comments

The distance from the completed portion of the proposed wellbore to the nearest completed portion of offset wellbore permitted or completed in the same formation was taken from the proposed Salt Ranch Fee 501-1830H on the same wellpad. The distance was measured in 2D.

There are no wells within 1,500' owned or operated by another operator.

Changes to the original submission are: surface hole, landing point and bottom hole locations, distance to nearest well on the pad. The changes that have been made to the well construction are outlined on the attached updated directional plan and well location plat. No changes have been made to the mineral lease description. The well location pad has been built. No drilling activity has occurred. No changes have been made to the surrounding land use.

### Best Management Practices

#### No BMP/COA Type

#### Description

1	Drilling/Completion Operations	Logging: One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
2	Drilling/Completion Operations	Bradenhead Monitoring: Operator acknowledges and will comply with COGCC Policy for Braden-head Monitoring during Hydraulic Fracturing Treatments in the Greater Wattenberg Area dated May 29, 2012.
