| | Location does not meet Final Reclamation requirements. Site does not appear fully, de-compacted, or properly revegetated. Location loop road & areas where equipment was located, appear compacted, gravel remains & portions are bare of vegetation. In graveled areas seeding rows are visible. Weedy species dominate in the compacted, graveled areas. Desirable vegetation is not uniform across the site. | |
| Corrective Action: | Complete Final Reclamation of Location including removal of gravel, de-compacting road, equipment areas, and reclaiming portions disturbed by these activities. Assess vegetation & site conditions in Fall 2020.
