**General Comment:**

On 11/2/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Additional stabilization is needed within the southeastern diversion to stabilize bare soils by 12/4/2020.

See below, and attached photos for additional detail.

-Operator submitted FIR Resolution Form describes operator response to corrective actions identified during a 2019 reclamation inspection.

## 1003 f. Weeds Noxious weeds? \_\_\_\_\_

Comment

Russian knapweeds are significantly reduced from 2019 inspection and many appear to be herbicide treated. However surviving individuals remain. Therefore, additional monitoring and treatment are needed here. Corrective is not considered complete until infestation is controlled. Revegetation is progressing within portions of the project area. Additional seeding may be needed after knapweed controlled.
